

# Release notes SYDI1

These release notes are applicable to the following modules:

- DIO48

---

**Software version** 0610  
**Hardware version** 0100, 0101, 0102, 0103  
**Platform** SYDI1  
**Date** 15-05-2012  
**Filename** DIO48-0100to0103-0610-service.spf

channel status bits all set to 24 bits

---

**Software version** 0609  
**Hardware version** 0100, 0101, 0102, 0103  
**Platform** SYDI1  
**Date** 06-09-2010  
**Filename** DIO48-0100to0103-0609-service.spf

added switch for channel mode in channel status block

---

**Software version** 0508  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 12-05-2010  
**Filename** DIO48-0100to0101-0508-service.zip

added silence detection on inputs. when silence is detected its also possible to give a event data\_error.

---

**Software version** 0407  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 24-12-2008  
**Filename**

Added lock to AES inputs(only works in transparent mode this because of hardware) its not possible to this in SRC mode.  
Fixed external reference selection (genlock and wordclock)

**Software version** 0306  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 25-08-2008  
**Filename** DIO48-0100to0101-0306-service.spf

Fixed selection locking to external reference and wordclock.  
Added Deemb-Emb option (for in combination with mastercard SAS11:  
Set SourceA1/2/3/4 to Add-on1/2/3/4 and SourceB1/2/3/4 to AES1L/1R/2L/2R)

**Software version** 0205  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 30-01-2007  
**Filename** DIO48-0100to0101-0205-service.spf

Fixed: Audio-Phase alignment of all channels in both SRC and Transp modes.

**Software version** 0204  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 22-12-2006  
**Filename** DIO48-0100to0101-0204-service.spf

Fixed: De-embedding with two add-on DIO48's

**Software version** 0203  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 24-05-2006  
**Filename** None

seperated delay on input

**Software version** 0102  
**Hardware version** 0100, 0101  
**Platform** SYDI1  
**Date** 13-04-2006  
**Filename** None

fixed: Left-Right swap AES audio input.  
fixed: Locking second DIO48 onto mastercard.
